

# The Future Is Watching:

## We Agree That Glasgow Is Our Business

We have entered the decisive decade for addressing the climate crisis—and our time to solve it is running out. There are just 25 days until the pivotal 26th UN Climate Change Conference of the Parties (COP26) in Glasgow.

We believe that solving climate change is a “must,” not a “maybe,” and we believe that everyone—from every sector—has a role to play. **That is why our companies have pledged to achieve net-zero emissions by 2050 or sooner, and to achieve significant emission reductions in pursuit of that goal by 2030.**

**We urge governments and corporate leaders around the world to join us in making meaningful commitments and progress in drawing down emissions this decade and announce them ahead of the Glasgow meeting.**

**No company and no country can do it alone.** Only by working together can we hope to solve the most existential crisis humanity has faced. That’s why Glasgow is our business—and why all the world will be watching.

**Ajay Banga**, Executive Chairman, Mastercard

**Andy Jassy**, President and Chief Executive Officer, Amazon

**Antonio Neri**, President and Chief Executive Officer, Hewlett Packard Enterprise
